13	Why do AI projects fail?
14	Women in AI leadership
15	Establish clear principles to avoid bias, discrimination and ensure fairness.
16	AI incident response best practices

TESTIMONIALS

Feedback from previous Data & AI ThinkLab attendees.

Fantastic oppurtunity to hear other people expertise and share ideas with data people. Thanks you for organising this event so well. I find conference as one of the best I was. It was visible that everybody felt like at home- well done!!!

Vesuvius

Learning from brilliant minds is one thing. But truly connecting, sharing and shaping the future of data together - that's what made the ThinkLinkers ThinkLab so special.

Mobile.de

Great event, amazingly organized. Nice venue, informative sessions and fantastic people. Love the reception, enthusiasm and professionalism keep up the good work!

Edwards Lifesciences

I had the great pleasure of joining a brilliant group of Data leaders at thinklinkers conference. Great discussion and debate, brilliant presenters and a really great environment created to enable shared learning and experience.

Marks and Spencer

It was truly inspiring to connect with such passionate and talented individuals who share my enthusiasm for data, people, and lifelong learning. The conversations, insights, and energy in the room were nothing short of incredible.

Volvo Penta

A very relevant conference with many good speakers. The setting with the limited number of participants gave good opportunity to interact both with speakers and other participants

Maersk Drilling

The event was truly inspiring packed with hands-on learning and meaningful conversations. Even the week after, I'm still reflecting on the insights and reviewing my notes to apply them at my company. I'm grateful for the experience, the connections made, and the opportunity to grow. Looking forward to what's next!

Knauf

The conference was very interesting and productive. The atmosphere was great thanks to limited number of the guests. I was able to meet specialists that helped me with my actual questions.

Terumo Europe

ABOUT THIS EVENT

Responsible AI ThinkLab is an independent, vendor-agnostic, business value-driven event for the people making AI work inside organisations.

AI needs a business case that stands up to scrutiny: measurable returns, trusted data and clear accountability. Across two days, we explore how to build profitable, ethical AI while managing regulatory, human and environmental impact.

We prioritise real-world case studies and practical insights, leaving ample space for questions, interaction and debate. From the EU AI Act and agent governance to workforce redesign and incident response, the focus is on decisions teams can put into practice.

Pio Marolla
Founder and CEO
ThinkLinkers

WHO SHOULD ATTEND?

- Heads of Responsible AI
- Chief AI Officers and Chief Data Officers
- AI governance and data strategy
